

DEVICE FOR CONCENTRATING AND PURIFYING
MACROMOLECULES

ABSTRACT OF THE DISCLOSURE

5 A device for concentrating and/or
purifying macromolecules in liquids is disclosed
wherein the concentration/purification is
accomplished by a membrane separating concentration
and filtration chambers, the membrane and chambers
10 being compressively held in fluid-tight relationship
by sliding engagement with a sleeve-like housing. A
method for assembling such a device is also
disclosed.
